Results-driven Full-Stack JavaScript Engineer with over 4 years of experience building scalable web applications and APIs. Proficient in Next.js, React, TypeScript, and serverless architectures, with a focus on clean code, SOLID principles, and performance optimization. Adept at collaborating with crossfunctional teams to deliver high-impact solutions, currently enhancing expertise in cloud technologies.

PROFESSIONAL EXPERIENCE

Cosmic Forge HealthNet, Lagos, Nigeria

2025 (Contract)

Frontend Developer/ UIUX Designer

- Led frontend development for a healthcare platform, designing 60+ screens and 300+ reusable components using Next.js and Figma.
- Ensured backend API alignment with Figma designs, improving integration efficiency by 20%.
- Wrote 300+ Vitest unit tests, reducing manual QA time by 35% and enhancing code reliability.
- Collaborated with designers to create a responsive design system for desktop and mobile platforms.

Energy Markets and Rates Consultants, Abuja, Nigeria

2024 - Present

UI Designer and Lead Frontend Developer

- Architected an enterprise-grade website redesign with Next.js, improving accessibility scores by 15% and user engagement by 25%.
- Built a custom CMS with TypeScript and Supabase, enabling non-technical editors to manage content independently.
- Designed high-converting landing pages, increasing qualified leads by 28% through modular, clean code.
- Applied SOLID principles to develop scalable codebases, collaborating with marketing and product teams to meet business goals.

Macgroup Technologies, Las Vegas, USA

2022 - 2024

Frontend Developer and No Code Developer

- Optimized application performance through data modeling and architecture improvements, reducing First Contentful Paint by 59% (3.9s to 1.6s)
- Implemented event-driven animations using GSAP and Framer Motion while maintaining 97+ Lighthouse performance scores
- Collaborated effectively across three time zones with distributed development team, maintaining 100% sprint delivery rate for 10 consecutive cycles

- Applied critical evaluation of new technologies and architectural decisions to support scalable enterprise solutions.
- Developed no code sites using WordPress and elementor as page builder to quickly ship website products faster, withing 2 to 3 days max.

Diplomats Digital World

2024

Lead Software Development Instructor

- Delivered comprehensive 40-hour MERN stack bootcamp to cohorts of 20 students, with 90% completing production-ready capstone projects
- Implemented Git workflow and code review processes, reducing feedback cycles from 5 days to 2 days
- Mentored junior developers through weekly office hours, resolving 120+ technical blockers and accelerating learning progress
- Demonstrated excellent communication skills and team-oriented approach in educational setting

EDUCATION

Federal University of Lafia, Nasarawa State, Nigeria

2024

Bachelor of Library and Information Science

- Graduated as second-best student in faculty and department (4.46 CGPA); highest GPA (4.80) in third Year.
- Developed skills in data management and analysis, applied to database design and software engineering.

SKILLS

Frontend: Next.js, React, React Native/Expo, Remix, Tailwind CSS, GSAP, Framer Motion

Backend: Node.js, TypeScript, tRPC, Zod, Appwrite, Supabase, MySQL, PostgreSQL, NoSQL

Tools: Vercel, GitHub Actions, Figma, Vitest, WCAG 2.1 (Accessibility), WordPress, Elementor

Principles: SOLID, Design Systems, Event-Driven Architecture, CI/CD

Soft Skills: Team Collaboration, Communication, Mentorship, Problem-Solving

CERTIFICATIONS

- Advanced Figma UI/UX Design (2025)
- Data Science and Machine Learning (In Progress, 2025)
